More Bootstrap: Image-based Content Blocks

This HTML will create 3 pieces of content side by side, with a feature image, a heading underneath, and some text underneath that. Perfect for highlighting important pieces of information on your website.

```
<html>

Price List Blocks

If you need to list pricing on your website, you can use a block like the section below. This will put 3 pricing blocks side by side, and allow you to list what the benefits are for each pricing bracket. For this week, start with the HTML below which, when run, shows you just one price block. Then, duplicate the code and change the blocks from “Standard” to “Developer” and “Group”, and give them different prices.

Remember - you are adding this piece to the end of the previous piece (where I have indicated in the code above, before /body)

Tip 1: Copy and Paste.

There is **A LOT** of duplication here (I’ve put blank lines to highlight the start and end of each section). Use copy and paste to copy whole sections (then update each section if you need to!). The only parts from each section that are different are marked in bold. Highlight some text, hold down Ctrl and press C to copy. Move your cursor to where you want to copy your text to. Hold down Ctrl and press V to paste. The copied text should appear in the new location.

Tip 2: Indentation is REALLY REALLY going to help you here!

Tip 3: To get the Euro symbol to appear, hold Ctrl and Alt together, and press 4

Tip 4: This section uses something called “Font Awesome” - a way to get icons to appear on your page. You have already added “Font Awesome” to your page in the “HEAD” section:

```
<link href="https://sensorpro.net/coderdojo/assets/css/font-awesome.min.css" rel="stylesheet">
```

Anywhere you see **class="fa fa-something"**, this is where an icon is being added.

For example: `<i class="fa fa-shopping-cart"></i>` will add a shopping cart icon! More about font awesome (and a list of hundreds of available icons) here:
